Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4, 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,505,986 to Oder.

Oder shows a double wall container as seen in Figs. 1 and 6, having a coupling structure formed by parts 40 and 94, a hollow portion 56 having a through hole for fluid dispensing, a flange 100 at the upper end of the hollow portion, a first connector 48 provided at the lower end of the hollow portion and connected to the interior container 26, a second connector 102 connected to the opening of the outer container 72, an annular elastic fin 96, a connection through hole 84.

Art Unit: 3754

In reference to claim 2:

The annular fin 96 is deformed upwards when the pressure inside the container increases and deforms downwards when the pressure of the container decreases.

In reference to claim 7:

The second connection has a convex portion as seen in Fig. 3.

3. Claims 19, 20, 23, 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,343,901 to Meshberg.

Meshberg shows a fluid storage container as seen in Figs. 1-4, having an external container 3, an internal container 9, a cylindrical coupling as seen in Figs. 3, a discharge dispensing opening 7, an internal space defined between the two containers, a fluid discharge pump 13 located in the coupling and an air vent 10.

In reference to claim 26:

The air vent 10 is formed by a through hole formed in coupling member.

Allowable Subject Matter

4. Claims 5, 6, 9-18, 21, 22 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Douglas shows a container with venting gasket. Gortz shows a pressurized dispenser. Meshberg ('191) shows a dispensing head for a squeeze dispenser. Quinn shows a closure cap and dispensing body assembly. Yamamoto shows a container provided applicator.
